

**HOSPITALITY
GROWTH
& CULINARY
CONSULTING**

PRE-OPENING MANAGEMENT

Opening a restaurant is one of the most complex projects in hospitality. From construction delays and vendor coordination to training staff and launch marketing, it's easy to get overwhelmed—and costly to get it wrong. That's why our Pre-Opening Management services are built to guide you through every critical step—on time, on budget, and fully operational when the doors open.

CRITICAL PATH PLANNING

Critical Path Planning identifies the essential tasks and timelines required to complete a project efficiently. It helps prioritize activities, avoid delays, and ensure successful, on-time project delivery.

VENDOR & CONTRACTOR COORDINATION

Vendor & Contractor Coordination ensures seamless collaboration with external partners by managing expectations, timelines, and deliverables. It enhances accountability, reduces delays, and supports smooth project execution.

OPERATIONAL SETUP

Operational Setup involves establishing the foundational systems, processes, and resources needed to launch or restructure a business. It ensures smooth day-to-day functioning, efficiency, and readiness for scalable growth.

SOFT OPENINGS & TEST SERVICE

Soft Openings & Test Service allow businesses to trial operations in a controlled environment before full launch. This phase helps identify and resolve issues, refine service delivery, and gather valuable feedback for improvement.

Mr Chef Subra is a premier hospitality advisory firm based in the UAE and India.
